

Professional Profile

As a highly motivated and detail-oriented Junior Frontend Developer, I have hands-on experience with HTML, CSS, JavaScript, React, Vue.js, SCSS, Firebase, and more. I have completed over 17 projects on Frontend Mentor and developed personal projects, including a movie trailer and music streaming site. With a strong ability to learn quickly and solve complex problems, I approach each project with precision and aim for the highest quality. I am also a great team player, having worked on university projects, a startup, and offered valuable feedback to other developers with over 40 comments on Frontend Mentor.
